

LED LIGHTING UPGRADE

MASERATI AUTO DEALERSHIP

ST. PETERSBURG, FL

OVERVIEW

WLS was brought onto The Maserati of St. Petersburg project to specify and install both interior and exterior lighting solutions. Because the dealership is located within 4 miles of the ocean, concrete poles were installed for the parking lot's site lighting. Concrete poles are exceptional when it comes to withstanding Earth's elements and are known for their structural integrity. Poles made of steel are likely to rust extremely fast due to the area's water with high salinity.
