

LED UPGRADE

ALAMEDA CROSSING

AVONDALE, AZ

In 2022, Alameda Crossing shopping center was due for an upgrade to LED lighting in order to meet PECO's new sustainability standards. WLS Lighting stepped in to help the client achieve their goals. WLS created a value engineered lighting site plan and proposal for all new LED site, wall pack, and recessed can lighting. The new site lighting fixtures utilized the existing site lighting parking lot poles.

In addition to all new LED lighting, Alameda Crossing is now outfitted with our exclusive site lighting controls, netLiNK Controls. The netLiNK Controls System provides customers with complete insight and control of their site lighting and significantly reduces maintenance and utility costs by way of dimming the LED lighting fixtures. Users have visibility into their entire portfolio of lighting systems from any smart device at any time.
