

LED UPGRADE

MOLINA HEALTHCARE OFFICE

LONG BEACH, CA

OVERVIEW

The Molina Healthcare lighting upgrade consisted of two floors inside the office building managed by the McKinney Advisory Group. WLS was able to create a new design layout removing 35% of the existing fixtures. The installed lighting system allows individual fixtures to be tunable to appropriate light levels. The new system takes advantage of motion control sensors, daylight harvesting and has a potential for demand response. The new Daintree lighting control system allows building management access to modify light levels, track energy consumption, monitor outages and observe savings from anywhere in the world.
