

## LED UPGRADE

# WINCHESTER CENTER

ROCHESTER HILLS, MI

In 2022, Winchester Center was due for an upgrade to LED lighting. The previous HID lighting did not live up to the center's new renovation standards. The client's goal was to increase the current light levels on the property's lighting using existing poles and locations. WLS stepped in to achieve our client's goals and create a value engineered lighting site plan and proposal for all new LED site, wall pack, and canopy lighting.

Winchester Chester is outfitted with our exclusive site lighting controls, netLiNK Controls. The netLiNK Controls System provides customers with complete insight and control of their site lighting and significantly reduces maintenance and utility costs by way of dimming the LED lighting fixtures. Users have visibility into their entire portfolio of lighting systems from any smart device at any time.
